

SALUS

2 Channel Programmer

Model No. EP200

The EP200 is a feature packed programmer allowing independent control of central heating and hot water. This 5/2 or 7 day programmer boasts the same functions as the EP100 but gives the individual features to both channels. Fitted with the industry standard back plate, this makes EP200 ideal for new installations or upgrades. A simple switch alternates the EP200 between 5/2 or 7 day.
